

## Frequently Asked Questions

### 1. Objective of IP for Commercialization

The objective is to implement activities for enabling Economic Operators to assess and define a strategy to protect, manage and commercially exploit their intellectual property, that results from ESA and national activities and programmes, and which provide competitive positioning in the space market in Spain.

The maximum amount of funding per project is €10,000 and can cover one or more of the services of IP Management and Strategy, IP Protection, and IP Revenue Management.

### 2. Who is eligible to apply

The applicant shall be a legal entity registered under Spanish law, with headquarters in Spain.

It shall be fully compliant with Spanish tax and social security obligations. With technologies developed in an ESA programme or in national calls.

The proposals from the Economic Operators shall indicate the support to be requested to the IP Specialist, the name of the IP Specialist.

ESA Technology Broker Spain shall help the Economic Operator identify an IP Specialists, when needed.

### 3. When you can apply

Open call, permanently open and published in the [ESA Technology Broker Spain web page](#).

A total of ten economic operators will be selected through open calls.

### 4. Application Language

Application template filled with your proposal shall be delivered in English.

### 5. Compatibility with other programs

There is no incompatibility with other programs, such as ESA-BIC for example.

Neither is also incompatible with requesting other financing from the ESA TB ES.

### 6. IP Framework

The financing must always go to the Spanish company and it will have to be related to an IP generated within the ESA or a national program.

Trademark registration, NDA, and contract review are included, but if they are linked to an IP generated within a contract with the ESA or National program.

The time to execute the financing is one year.
